EDUCATION

TUD Grangegorman

MSc Creative Digital Media & UX

Sep. 2024 – Nov. 2025

Grangegorman, Dublin

- Focused on UX research, interaction design, and gameplay-focused prototyping.
- Developing thesis project *It Ain't That Deep*, a 3D underwater exploration game blending game feel and user experience design.

TUD Tallaght

BSc in Computer Science with Software Development

Sep. 2019 – May 2023

Tallaght, Dublin

TECHNICAL SKILLS

Languages: C#, C++, SQL, JavaScript, HTML, CSS

Frameworks/Tools: Unity, React Native, Expo, Django, Firebase, Git, NGO, FMOD, Figma

Design: Aseprite, Adobe Suite, DaVinci Resolve, CapCut

EXPERIENCE

Application Development Intern

Workday

Feb. 2022 – Aug. 2022

Smithfield, Dublin

- Built CI/CD automation pipelines and improved software quality across SaaS workflows.
- Resolved critical production bugs, contributed to robust testing, and maintained documentation.
- Participated in agile development with peer code reviews and cross-team collaboration.

PROJECTS

It Ain't That Deep (Thesis Project) | *Unity, C#, Figma, FMOD, UX Research*

github.com/Jibbyie/Dolphin-Simulator |

Feb. 2025 – Present

- 3D underwater exploration game. Emphasizes environmental storytelling, dialogue-based interaction design, quests and player guidance through subtle feedback systems.
- Integrated player-centered UI design, non-verbal feedback, and Figma-driven UI flows into a playable vertical slice.
- Research-led design focusing on accessibility, playability, and control feel.

Unity Gameplay Demos (Ongoing) | *Unity, C#, Aseprite, FMOD*

github.com/Jibbyie/game-a-week | jibbyie.itch.io/

Jun. 2025 – Present

- Developed modular gameplay systems (e.g., movement, combat, multiplayer) across 2D and 3D prototypes.
- Focused on gameplay feel, architecture, and iteration within scoped vertical slices and WIP experiments.

Multiplayer Test Game | *Unity, C#, Netcode for GameObjects*

github.com/Jibbyie/Wk3_MultiplayerTest

Jun. 2025 - Present

- Created a 2D multiplayer prototype with up to 4 players using Unity Netcode for GameObjects.
- Implemented health sync, respawn flow, server-authoritative collision, and rematch functionality.
- Built a foundation for understanding multiplayer architecture and client-server sync.

Hacking Healthcare Hackathon | *AWS, Python, Microbit, Firebase*

Sep. 2022 – Oct. 2022

- Collaborated on creating a prototype using Microbit and Firebase, enhancing patient convenience by 50% through SMS notifications for dosage recommendations and blood-testing reminders.
- Achieved 4th place out of 8 teams, showcasing the prototype's effectiveness and innovative solutions.

VOLUNTEERING

Event Volunteer | *J-Con, Comic-Con, Shurikon, Tidy Towns*

2018 – Present

- Supported logistics and participant engagement at community events and conventions.

Youth Club Leader | *Foroige Youth Club*

2019 – 2022

- Planned and ran weekly events focused on youth development, creativity, and inclusion.

HOBBIES

Indie Game Development, Bodybuilding, Running, Video Editing, Digital Pixel Art
